ORGANIZATIONS

Association for Computing Machinery - Projects

📅 Feb, 2019 - May, 2019

📍 Richardson

- Built a web app (The New News) that educated users on the current political landscape
- Utilized Agile Development and Scrum Method to Accelerate Development
- Lead the Front-end Team, responsible for utilization of React.js to create intuitive design
- Effectively presented application to panel of industry professionals
- Tools - HTML, CSS, JavaScript, Python, R, Git, React.js, Beautiful Soup

Association for Computing Machinery - Ignite

📅 Sept, 2019 - Present

📍 Richardson

- Developing Dormdash, a delivery service application for college students
- Tools - Flutter, Dart

Mentor

Association for Computing Machinery - Education

📅 Sept, 2019 - Present

📍 Richardson

PROJECTS

Pic3

Social Media Application

📅 Aug, 2017 - Jun, 2019

📍 Irving

- Co-Founded and developed Pic3, social media app designed to assist users in helping discover their closest friends
- Designed and implemented custom face filters using machine learning through Firebase ML Kit
- Developed messaging with push notifications
- Tools - Java, Tensorflow, Node.js, Firebase

College Grades

Full Stack application

📅 Jun, 2019 - Sept, 2019

📍 Irving

- WebApp that displays median grades for 250 classes at Cornell university
- Utilized Google sheets to get median grade information from Cornell's subreddit r/Cornell
- Implemented data collection using Google Sheet and Google Drive API
- Tools - HTML, CSS, Javascript, Python, Flask

SUMMARY

Hard working **Software Engineer** with excellent **communication skills**. I have developed a **Full Stack** application for **ACM Projects** and **ACM Ignite**. Currently a **ACM Mentor** for freshman. I am fascinated with new technology and **love learning**. Taking **machine learning** course and currently learning about **Azure AI Engineering** from Francis Dogbey of **Microsoft**. Learning to play **Piano** in free time.
